Construction

Chapter 14

Key Concepts

- Be familiar with the system construction process.
- Understand different types of tests and when to use
- Understand how to develop documentation.

Managing Programming

- ▣ Assigning Programmers
- ▣ Coordinating Activities
- ▣ Managing the Schedule

Coordinating Activities

- Regular Project Meetings
- Follow standards
 - File naming
 - Forms to be completed
 - Programming guidelines
- Coordinate traceability of implementation to requirements

Managing the Schedule

- Control scope creep
- Manage schedule slippage
- Create a risk assessment

Avoid Implementation Mistakes

- ▣ Research-oriented development
- ▣ Using low-cost personnel
- ▣ Lack of code control
- ▣ Inadequate testing

Designing Tests

- ▣ Unit tests
- ▣ Integration tests
- ▣ System tests
- ▣ Acceptance tests

Testing and Object Orientation

- Encapsulation and information hiding
- Polymorphism and dynamic binding
- Inheritance
- reuse

Unit or Class Tests

- ▣ Focus on a single unit – the class
 - ▣ Black-box Testing
 - ▣ White-box Testing
- ▣ Develop tests for each contract of a class
 - ▣ Test for initial conditions
 - ▣ Possibly test for random inputs

Integration Tests

- ▣ How a set of classes work together
- ▣ Classes pass unit tests first
- ▣ Interface testing
- ▣ Use-Case Testing
- ▣ Interaction Testing
- ▣ System Interface Testing

System Testing

- ▣ Requirements
- ▣ Usability
- ▣ Security
- ▣ Performance
- ▣ Documentation

Acceptance Testing

- ▣ Alpha
 - ▣ Conducted by users to ensure they accept the system
- ▣ Beta
 - ▣ Users use real data, not test data

Developing Documentation

- System Documentation
 - Produced by systems analysis and design process
 - Automate documentation for classes and methods
- User Documentation
 - User Manuals
 - Training Manuals
 - Online Help Systems

Online Documentation Strengths

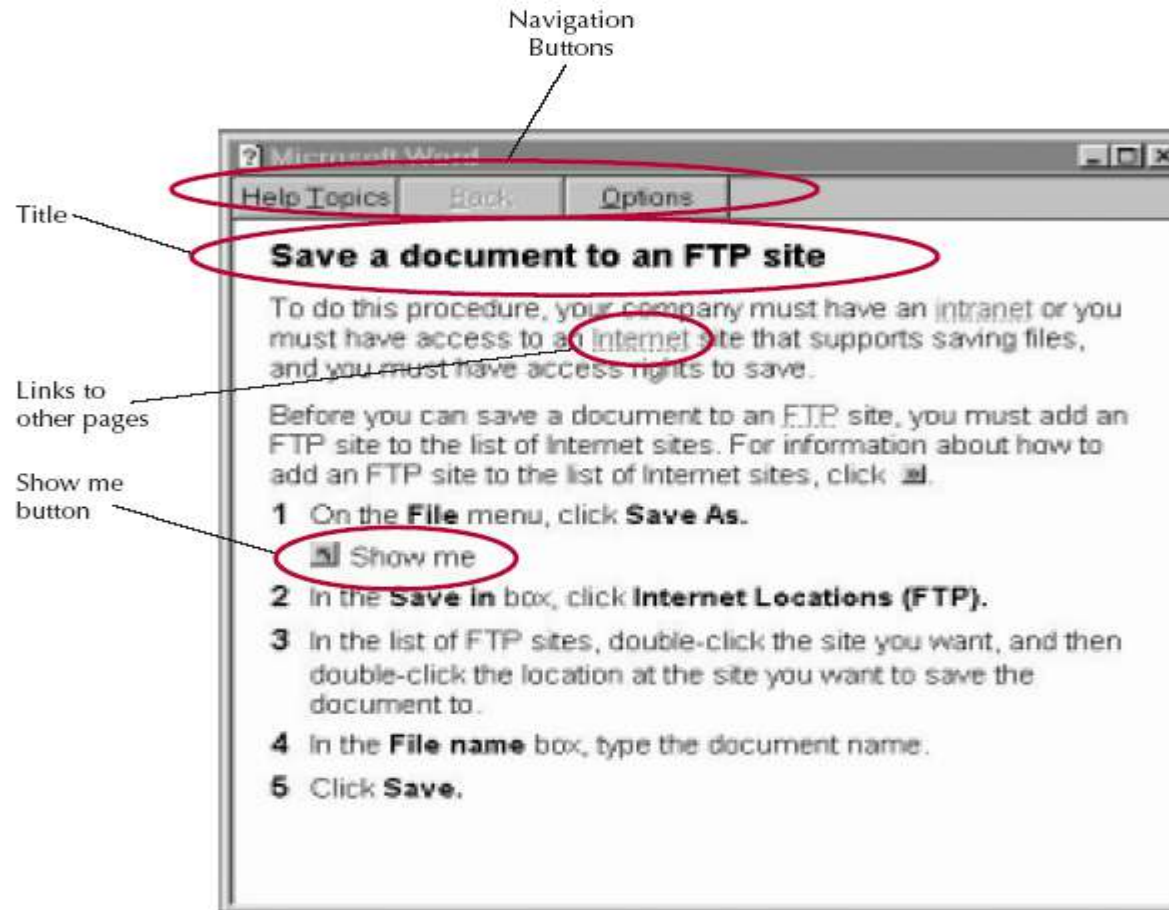

- Facilitates searching
- Same information can be presented in different formats
- Provide interaction with users using links or “tool-tips”
- Less expensive to distribute

Designing Documentation Structure

- Table of Contents
- Navigation Controls lead user to Documentation topics
- How to perform certain tasks
- Definitions of important terms

Online Documentation Example

Documentation Writing

- ▣ Use Active Voice
- ▣ E-prime Style
- ▣ Consistent terms
- ▣ Simple language
- ▣ Friendly language
- ▣ Parallel grammatical structures
- ▣ Correct use of steps
- ▣ Short paragraphs

Applying Concepts at CD Selections

- ▣ Managing Programming
 - ▣ 3 programmers
- ▣ Testing
 - ▣ Unit Test – Blackbox tests
 - ▣ Integration – User Interfaces
 - ▣ System – Requirements, security, performance, and Usability
 - ▣ Acceptance – Alpha and Beta

Develop User Documentation

- Reference Documents for web interface and system management components
 - Help topics
- Documentation Component
 - Table of Contents
 - Index
 - Find or search
 - Links to definitions

Summary

- Assign programmers and coordinate their activities
- Plan for the testing of all aspects of the application
- Write the documentation for both the systems side and the user aspect
